

WHY YOUR SUPPLY CHAIN TEAM NEEDS UPSKILLING

85 million jobs could go unfilled due to a severe talent shortage by 2030, resulting in \$8.5 trillion of lost revenue.

Don't let your bottom line take a hit.

INVEST IN YOUR SUPPLY CHAIN WORKFORCE TODAY.
Build an agile workforce that:

INCREASES ROI

The Society for Human Resource Management (SHRM) reports the average cost per hire was nearly \$4,700. However, many employers estimate the total cost to hire a new employee can be as much as four times the position's salary.

ENHANCES EMPLOYEE PERFORMANCE

Equipping your team with the latest skills helps them work more efficiently.

IMPROVES EMPLOYEE RETENTION AND ENGAGEMENT

Training programs show you're invested in their future, leading to greater loyalty and engagement.

KEEPS YOU COMPETITIVE

Companies that prioritize learning and development are better prepared to innovate and adapt to constant change. When employees feel overwhelmed, they leave — often for your competition.

FUTURE-PROOFS YOUR WORKFORCE

Upskilling and reskilling create a continuous learning environment that builds workforce resilience.
